SUMMARY

Skilled developer in C#, Java, SQL, ASP.NET, HTML5, CSS, and JavaScript, with expertise in software design patterns. Proficient in deploying applications on web servers, utilizing version control, and developing/consuming REST APIs. Adept at troubleshooting hardware and software issues, passionate about continuous learning, and effective in collaborative cross-functional teams.

EXPERIENCE

TD Canada Trust, Mississauga— *Operations Officer*

March 2022 - March 2023

Performed specialized tasks relating to credit maintenance while operating within the business' credit risk appetite and regulatory framework.

- Participated in team meetings, providing feedback on performance management.
- Communicated effectively and exercised due diligence with business partners from retail and sales channels, external solicitors, and other financial institutions.

Ricoh Canada, Mississauga— *Co-op Application Developer*

January 2019 - January 2020

Worked primarily in Salesforce development, developing cloud services to automate business processes and integrate external applications.

- Deployed microservices on Microsoft's .NET platform to replace licensed services for document generation.
- Participated in daily stand-ups and weekly reviews and demonstrations.

EDUCATION

Sheridan College, Brampton — *Software Engineering*
